

High performance anti-loosening bolt
MOTIONTITE®

We're now looking for **partners** for production and sales of
Anti-loosening screw MOTIONTITE®
in America, Europe and Asia!

"MOTIONTITE®" is a high-performance screw resolving loosening, breakage and seizure.

1 Strong anti-loosening power

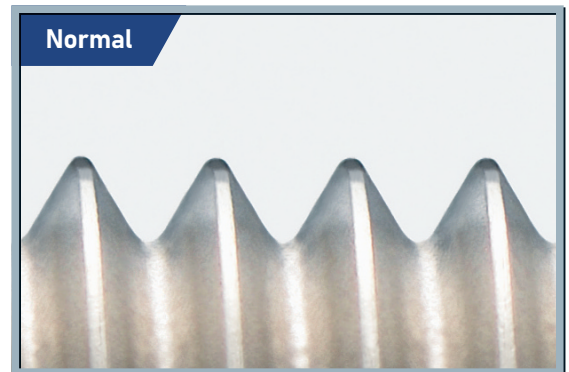

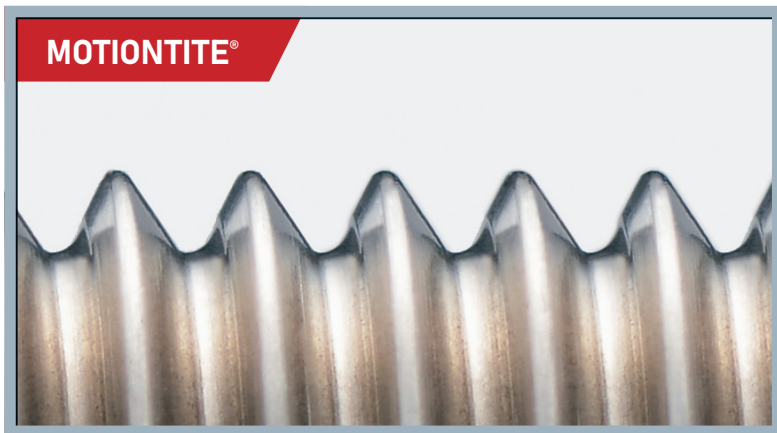

Elastic repulsive forces act on threads.
Therefore, just by tightening MOTIONTITE®
in a normal way, it wouldn't loosen easily.

2 Thread structure hard to break

Load sharing ratios among threads are
averaged. Therefore, fatigue strength
improves, and breakage is inhibited.

3 Seizure prevention

Frictional heat does not concentrate in
threads. Therefore, thermal expansion is
suppressed, and seizure can be prevented.

- "MOTIONTITE®" corresponds to coarse screw threads and fine screw threads ranging from M2 to M16.
- Mechanical properties of screw comply with ISO standards.
- Material of screw is heat-treatable carbon steel and stainless steel.
- Thread rolling dies and dedicated ring gauges are available from us for value.
- We ask for only monthly royalties. Contract money is unnecessary.
